

REMARKS

Applicant has provided a new Abstract of the Disclosure. Applicant has amended the claims to attend to housekeeping and to place the Application in proper form for examination. Claims 2-9 were amended to remove multiple dependencies and to conform to US patent practice. Support for the amendments to claims 2-9 may be found in originally filed claims 2-9. New claim 10 recites a method for preventing corrosion of cooling and heating systems comprising magnesium and magnesium alloys wherein the method comprises circulating an antifreeze comprising the antifreeze concentrate of claim 1 in the heating and cooling system and new claim 11 recites that the heating and cooling system of claim 10 comprises an automobile engine. Support for the amendments to new claims 10 and 11 may be found in Applicant's Specification at page 1 in the first 2 paragraphs. It is believed that no new matter has been introduced by these amendments.

An early and favorable action on the merits is respectfully requested. The Commissioner is hereby authorized to charge any fee deficiency to Deposit Account No. 03-2060.

Respectfully submitted,

Richard P. Silverman, Agent for Applicant  
Registration No. 36,277
